Genres in the Internet Janet Giltrow 2009-10-28 This volume brings together for the first time pragmatic, rhetorical, and literary perspectives on genre, mapping theoretical frontiers and initiating a long overdue conversation amongst these methodologies. The diverse approaches represented in this volume meet on common ground staked by Internet communication: an arena challenging to traditional ideas of genre which assume a conventional stability at odds with the unceasing innovations of online discourse. Drawing on and developing new ideas of genre, the research reported in this volume shows, on the contrary, that genre study is a powerful means of testing commonplaces about the Internet world and, in turn, that the Internet is a fertile field for theorising genre.

Transport Development Challenges in the 21st Century Michal Suchanek 2021-04-27 This proceedings present current trends in the transport growth. It presents transport solutions both at a micro-level, such as that of a single city or a single company, as well as at a macro-level of a whole transportation system. The transport decisions made by an individual in regards to the transport mode and route, add up to the structure and efficiency of the whole system. Transport systems cannot grow extensively anymore, due to lack of space or the amount of additional costs, so the authors presents new solutions, ones which are innovative and sustainable, while also increasing the efficiency of transport operations. These solutions are analyzed for performance at a scale of individual cities or companies, as well as whole transport systems. The researchers, who are often also practitioners in the field of transport, provide not only the theoretical background for the transport analysis but also empirical data and practical experience.

Affordable Housing Governance and Finance Gerard Van Bortel 2018-09-03 There is a large shortage of affordable housing across Europe. In high-demand urban areas housing shortages lead to unaffordable prices for many target groups. This book explores innovations to support a sufficient supply of affordable and sustainable rental housing. Affordable housing is increasingly developed, financed and managed by a mix of market, state, third sector and community actors. Recent decades in large parts of the Western world have consecutively shown state-dominated, non-profit housing sectors, an increased role for market forces and the private sector, and the rise of initiatives by citizens and local communities. The variety of hybrid governance and finance arrangements is predicted to increase further, leading to new affordable housing delivery and management models. This book explores these innovations, with a focus on developments across Europe, and comparative chapters from the USA and Australia. The book presents new thinking in collaborative housing, co-production and accompanying finance mechanisms in order to support the quantity and the quality of affordable rental housing. Combining academic robustness with practical relevance, chapters are written by renowned housing researchers in collaboration with practitioners from the housing sector. The book not only presents, compares and contrasts affordable housing solutions, but also explores the transferability of innovations to other countries. The book is essential reading for researchers and professionals in housing, social policy, urban planning and finance.

Designing for Longevity Louise Møller Haase 2022-10-12 Product longevity is one of the cornerstones in the transition towards a more sustainable society and a key driver for the circular economy model. This book provides designers, developers, and creators with five distinctive expert strategies, detailed case studies, action guides and worksheets that support both beginning and advanced design practitioners in creating new product concepts with long-lasting strategic fits. Designing for Longevity shows how expert design teams create original and long-lasting product concepts from the early development phase. It focuses on integrating business knowledge, market conditions, company capabilities, technical possibilities and user needs into product concepts to make better strategic decisions. It demonstrates how, for products to be durable, designers must create a long-lasting strategic fit for the customer, company, and market. Key case studies of products such as Bang & Olufsen's A9, LEGO Ninjago and Friends and Coloplast's Sensura Mio, among others, offer readers inspiration, guidance and real-world insights from design teams showing how the strategies can be applied in practice. Action guidelines and worksheets encourage broad, analytical problem-solving to identify and think through challenges at the early concept stage. Beautifully designed and illustrated in full colour throughout, this book combines original research and the hands-on tools and strategies that design practitioners need to create useful, sustainable products.

Behavioral Aspects of AIDS David G. Ostrow 2013-06-29 As we enter the last decade of the twentieth century, the AIDS epidemic looms ever larger and threatening. The specter of upwards of a million deaths in the United States and perhaps many millions worldwide from a sexually transmitted virus shakes our belief in modern medical science, while challenging the foundations of democratic society. Almost ten years into the epidemic, and with an enormous body of basic science research on the Human Immunodeficiency Virus (HIV), we still do not know why AIDS emerged when it did or how to stop its spread. A very humbling experience for scientists, clinicians, public health experts, politicians, and the general public. Yet there are signs that a well coordinated multidisciplinary research program can conquer the epidemic and, perhaps, provide the basis for preventing future epidemics. The HIV family of viruses is now better understood, both in terms of structure and function, than any other virus. Genetically engineered peptides and nucleic acids are being tested as specific treatments or vaccines against HIV infection/disease. Most promising are the strides which have been made in understanding those aspects of human behavior which have contributed to the spread of HIV infection and which must be substantially modified if AIDS is to be controlled and

eventually eradicated. The basis of that understanding has roots in a diverse set of disciplines which have converged in the work presented in this book.

The CISO Journey Eugene M Fredriksen 2017-03-16 The book takes readers through a series of security and risk discussions based on real-life experiences. While the experience story may not be technical, it will relate specifically to a value or skill critical to being a successful CISO. The core content is organized into ten major chapters, each relating to a "Rule of Information Security" developed through a career of real life experiences. The elements are selected to accelerate the development of CISO skills critical to success. Each segments clearly calls out lessons learned and skills to be developed. The last segment of the book addresses presenting security to senior execs and board members, and provides sample content and materials.

ICU Resource Allocation in the New Millennium David Crippen 2012-09-14 Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive. Yet in response to the global financial crisis of the last few years, healthcare funding is slowing or decreasing throughout the world. How we manage health care resources in the intensive care unit (ICU) now and in a future that promises only greater cost constraints is the subject of this book, the third in an informal series of volumes providing a global perspective on difficult issues arising in the ICU. Taking 12 developed countries as their focus, leading experts provide a country-by-country analysis of current ICU resource allocation. A second group of experts use the chapters as a departure point to analyze current ICU resource allocation at the level of the global medical village. The process is repeated, but with an eye toward the future – first country by country, then at the global level – that takes into account initiatives and reforms now underway. A fictional healthcare plan, the "Fair & Equitable Healthcare Plan," is put forth to address weaknesses in existing approaches, and healthcare experts and ethicists are invited to respond to its often provocative provisions. Itself structured as a dialogue, the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead.

Crime and Fear in Public Places Vania Ceccato 2020-07-15 The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9780429352775> has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. No city environment reflects the meaning of urban life better than a public place. A public place, whatever its nature—a park, a mall, a train platform or a street corner—is where people pass by, meet each other and at times become a victim of crime. With this book, we submit that crime and safety in public places are not issues that can be easily dealt with within the boundaries of a single discipline. The book aims to illustrate the complexity of patterns of crime and fear in public places with examples of studies on these topics contextualized in different cities and countries around the world. This is achieved by tackling five cross-cutting themes: the nature of the city's environment as a backdrop for crime and fear; the dynamics of individuals' daily routines and their transit safety; the safety perceptions experienced by those who are most in fear in public places; the metrics of crime and fear; and, finally, examples of current practices in promoting safety. All these original chapters contribute to our quest for safer, more inclusive, resilient, equitable and sustainable cities and human settlements aligned to the Global 2030 Agenda for Sustainable Development.

Last Stand Randall Kramer 1997-03-06 During the past century, tropical rain forests have been reduced to about half of their original area, with a consequent loss of biodiversity. This book takes a close look at how this has happened and what the consequences may be, with an emphasis on those strategies that have proven successful in stemming the loss of plant and animal inhabitants. It describes the use of protected areas such as sacred groves, royal preserves, and today's national parks, which have long served to shield the delicate forest habitats for countless species. Although programs for protecting habitats are under increasing attack, this book argues that a system of protected areas must in fact be the cornerstone of all conservation strategies aimed at limiting the inevitable reduction of our planet's biodiversity. Written by leading experts with years of experience, the book integrates ecological, economic and political perspectives on how best to manage tropical forests and their inhabitants, throughout the world. In addition to conservationists, policy makers, and ecologists, the book will serve as a useful text in courses on tropical conservation.

Freedom of Expression in Russia's New Mediasphere Mariëlle Wijermars 2019-11-14 In recent years, the Russian government has dramatically expanded its restrictions on the internet, while simultaneously consolidating its grip on traditional media. The internet, however, because of its transnational configuration, continues to evade comprehensive state control and offers ever new opportunities for disseminating and consuming dissenting opinions. Drawing on a wide range of disciplines, including media

law, human rights, political science, media and cultural studies, and the study of religion, this book examines the current state of the freedom of speech, freedom of expression, and media freedom in Russia, focusing on digital media and cross-media initiatives that bridge traditional and new media spheres. It assesses how the conditions for free speech are influenced by the dynamic development of Russian media, including the expansion of digital technologies, explores the interaction and transfer of practices, formats, stylistics and aesthetics between independent and state-owned media, and discusses how far traditional media co-opt strategies developed by and associated with independent media to mask their lack of free expression. Overall, the book provides a deep and rich understanding of the changing structures and practices of national and transnational Russian media and how they condition the boundaries of freedom of expression in Russia today.

Public Spaces, Marketplaces, and the Constitution Anthony Maniscalco 2015-10-15 Examines how the Supreme Court has banished free expression from shopping malls and other public spaces. In spite of their public attractions and millions of visitors, most shopping malls are now off-limits to free speech and expressive activity. The same may be said about many other public spaces and marketplaces in American cities and suburbs, leaving scholars and other observers to wonder where civic engagement is lawfully permitted in the United States. In *Public Spaces, Marketplaces, and the Constitution*, Anthony Maniscalco draws on key legal decisions, social theory, and urban history to demonstrate that public spaces have been split apart from First Amendment protections, while the expression of political ideas has been excluded from privately owned, publicly accessible malls. Today, the traditional indoor suburban shopping mall, that icon of modern American capitalism and culture, is being replaced by outdoor retail centers. Yet the law and courts have been slow to catch up. Maniscalco argues that scholars, students, and the public must confront these innovations in commercial design and consumer practices, as well as what they portend for contemporary metropolitan America and its civic spaces.

Modern Social Work Practice Mark Doel 2017-03-02 *Modern Social Work Practice* is an interactive book designed to provide readers with an opportunity to engage with key aspects of current social work practice. It also provides an excellent digest of the significant literature. Each chapter is introduced with an activity or exercise designed to aid student learning in discrete aspects of practice, building up to a complete curriculum for practice learning. The book builds upon the success and style of *Social Work Practice* (1993) and *The New Social Work Practice* (1998). Mark Doel and Steven M. Shardlow have shaped the book to take account of the National Occupational Standards for Social Work, aiming to provide a creative, practical and up-to-date resource for teaching and learning in line with current practices.

Success Factors for Future Growth of Car Sharing Services Jens

Kopp 2020-03-30 Jens Kopp analyzes the potential of car sharing as a new mobility solution in light of progressive urbanization and researches factors influencing the use of car sharing to assess the growth outlook of car sharing services. He performs a regression analysis to identify statistically significant factors influencing the use and evaluation of car sharing services based on an empirical field research conducted in Germany (n=175). Key findings

include that cost saving is the only researched factor relevant to influence the use of car sharing services as well as the evaluation of car sharing and the assessment of its future. The existing research shows that car sharing is a viable lever to address substantial ecological and economic mobility issues and the conducted research provides new insights into the factors influencing the use and evaluation of car sharing services.
