A Cultural Economic Analysis of Craft Anna Mignosa 2019-06-11 Are we aware of the values of craft? In this edited volume, cultural economists, researchers and professionals provide an interdisciplinary discussion of the relevance and contribution of the craft sector to

the economy, as well as to society at large. Mignosa and Kotipalli bring together contributors to compare the craft sector across countries, analysing the role of institutions, educational bodies, organisations and market structure in its evolution and perception. The Western approach to craft and its subordinate

position to the arts is contrasted with the prestige of craftsmanship in Eastern countries, while the differing ways that craft has attracted the attention of policy agencies, museums, designers and private institutions across regions is also analysed. This volume is vital reading to those interested in the economic features of craft and craftsmanship around the world, as well as for those interested in the importance of policy in bringing about effective sustainable development.

Microwave Scattering and Emission Models for Users

Adrian K. Fung 2010 Today, microwave remote sensing has evolved into a valuable and economical tool for a variety of applications. It is used in a wide range of areas, from geological sensing, geographical mapping, and weather monitoring, to GPS positioning, aircraft traffic, and mapping of oil pollution over the sea surface. This unique resource provides microwave remote sensing professionals with practical scattering and emission data models

that represent the interaction between electromagnetic waves and a scene on the Earth surface in the microwave region. The book helps engineers understand and apply these models to their specific work in the field. CD-ROM Included! Contains Mathematica code for all the scattering and emission models presented the book, so practitioners can easily use the models for their own applications.

From Legislators to the End-User Manfred Fuchs 2011-04-02 The Construction Products Directive (89/106/EEC – CPD) should have facilitated putting construction products on any national market within the European Economic Area. Two decades later, its practical impact is still relatively weak. By going beyond the scope of most studies on the implementation of EU legislation at the level of the practical end-users (architects, civil engineers, construction companies), this study highlights the fact that the acceptance of this professional group not only plays a major role in the practical implementation of this directive, but could also change, strengthen or neutralise the intentions of policy makers and administrators at the EU and national level. The book is valuable reading for practical users of the CPD, researchers in political/administrative sciences and professionals working in international institutions and organizations.

Sustaining Growth and Performance in East Asia

Charles Harvie 2005-01-01 This third book in the series focuses on how small and medium sized enterprises (SMEs) contribute to achieving and sustaining growth and performance in their

economies, as well as the ways in which governments can assist and enhance that contribution. This is of particular concern given the trauma suffered by East Asian economies in the wake of the financial and economic crisis of 1997-98. Faced with the need to restructure and reform their economies and thereby achieve a firm foundation for future sustainable growth, many East Asian countries actively pursued SME growth, focusing on the encouragement of entrepreneurialism in the private sector.

Drawing on the insights of a wide range of SME experts, the book provides a broad coverage of important aspects of SMEs, including: the contribution of micro-enterprises to economic recovery and poverty alleviation measurement and evaluation issues managing knowledge development ethical values in SMEs the internationalisation process entry mode decisions in export markets technological sourcing and use of the Internet. Presenting a contemporary analysis of SME developments in

East Asia, both academics and policymakers will find Sustaining Growth and Performance in East Asia of great interest.

Hypertext semiotics in the commercialized Internet Moritz Neumüller 2003-04-15
Inhaltsangabe: Abstract: Building on approaches that have succeeded in applying semiotic principles and methodology to computer science, such as computer semiotics, computational semiotics, and semiotic interface engineering, this dissertation establishes a systematic account for those researchers who are ready to look at hypertext from a semiotic point of view. Rather than a new hypertext model, this work presents the prolegomena of a theory of hypertext semiotics, interlacing the existing models with the findings of semiotic research, on all levels of the textual, aural, visual, tactile and olfactory channels. A short history of hypertext,

from its prehistory to today's state of the art systems and the current developments in the commercialized World Wide Web creates the context for this approach which should be seen as a fortification of the connection between the media semiotic approach and computer semiotics. While computer semioticians claim that the computer is a semiotic machine and Artificial Intelligence scientists underline the importance of semiotics for the construction of the next hypertext generation, this paper makes use of a much broader methodological basis. These findings are placed in the context of the commercialization of the Internet. Besides identifying the main challenges for eCommerce from the viewpoint of hypertext semiotics, the author concentrates on information goods and the current limitations for a new economy, such as restrictive intellectual property and copyright laws. A semiotic analysis of iMarketing techniques and the Toywar complete the dissertation. Zusammenfassung: Diese

Dissertation legt einen systematischen Ansatz für all jene Forscher dar, die bereit sind, Hypertext aus einer semiotischen Perspektive zu betrachten. Durch die Verknüpfung existierender Hypertext-Modelle mit den Resultaten aus der Semiotik auf allen Sinnesebenen der textuellen, auditiven, visuellen, taktilen und geruchlichen Wahrnehmung skizziert der Autor Prolegomena einer Hypertext-Semiotik-Theorie, anstatt ein völlig neues Hypertext-Modell zu präsentieren. Eine Einführung in die Geschichte der Hypertexte, von ihrer Vorgeschichte bis zum heutigen Entwicklungsstand und den gegenwärtigen Entwicklungen im kommerzialisierten World Wide Web bilden den Rahmen für diesen Ansatz, welcher als Fundierung des Brückenschlages zwischen Mediensemiotik und Computer-Semiotik angesehen werden darf. Während Computer-Semiotiker wissen, dass der Computer [...]

Working with Interpreters in Mental Health

Hitesh Raval 2014-02-04 Why are interpreters an important part of modern healthcare provision? In today's society, there is an increasing need for mental health professionals to work with interpreters, yet coverage of this subject in the existing literature is scarce. Working with Interpreters in Mental Health gives an insight into the issues and problems of professionals working with interpreters in the mental health field. Informed by theoretical, research and practice considerations, Working with Interpreters in Mental Health helps practitioners to develop better ways of helping service users who need an interpreter. Combining contributions from a number of different disciplines, this book discusses: * interpreters in medical consultations * issues of language provision in health care services * the application of theoretical frameworks to the work with interpreters * the work of interpreters in a variety of practical settings. Whilst the focus is placed within a mental health context, many

of the issues raised apply equally to other context where interpreters are needed. This book will be invaluable for practitioners of psychology, psychiatry, social work and other health professionals.

Learn Cocoa on the Mac David Mark

2010-06-25 The Cocoa frameworks are some of the most powerful frameworks for creating native desktop applications available on any platform today, and Apple gives them away, along with the Xcode development environment, for free! However, for a first-time Mac developer, just firing up Xcode and starting to browse the documentation can be a daunting task. The Objective-C class reference documentation alone would fill thousands of printed pages, not to mention all the other tutorials and guides included with Xcode. Where do you start? Which classes are you going to need to use? How do you use Xcode and the rest of the tools? This book answers these questions and more, helping you find your way through the

jungle of classes, tools, and new concepts so that you can get started on the next great Mac OS X application today. Jack Nutting is your guide through this forest; he's lived here for years, and he'll show you which boulder to push, which vine to chop, and which stream to float across in order to make it through. You will learn not only how to use the components of this rich framework, but also which of them fit together, and why. Jack Nutting's approach, combining pragmatic problem-solving with a deep respect for the underlying design philosophies contained within Cocoa, stems from years of experience using these frameworks. He'll show you which parts of your application require you to jump in and code a solution, and which parts are best served by letting Cocoa take you where it wants you to go. The path over what looks like a mountain of components and APIs has never been more thoroughly prepared for your travels. With Jack's guidance, the steep learning curve becomes a pleasurable adventure. There is still

much work for the uninitiated, but by the time you're done, you will be well on your way to becoming a Cocoa master.

DW 2.0: The Architecture for the Next Generation of Data Warehousing W.H. Inmon
2010-07-28 DW 2.0: The Architecture for the Next Generation of Data Warehousing is the first book on the new generation of data warehouse architecture, DW 2.0, by the father of the data warehouse. The book describes the future of data warehousing that is technologically possible today, at both an architectural level and technology level. The perspective of the book is from the top down: looking at the overall architecture and then delving into the issues underlying the components. This allows people who are building or using a data warehouse to see what lies ahead and determine what new technology to buy, how to plan extensions to the data warehouse, what can be salvaged from the current system, and how to justify the expense at the most practical level. This book gives experienced data warehouse professionals everything they need in order to implement the new generation DW 2.0. It is designed for

professionals in the IT organization, including data architects, DBAs, systems design and development professionals, as well as data warehouse and knowledge management professionals. * First book on the new generation of data warehouse architecture, DW 2.0. * Written by the "father of the data warehouse", Bill Inmon, a columnist and newsletter editor of The Bill Inmon Channel on the Business Intelligence Network. * Long overdue comprehensive coverage of the implementation of technology and tools that enable the new generation of the DW: metadata, temporal data, ETL, unstructured data, and data quality control.

Web Portals Arthur Tatnall 2005-01-01 A Web Portal is a special web site designed to act as a gateway giving convenient access to other related sites. This book investigates the various types of portals and describes how they can be used in business applications. After considering the nature of portals, the book describes the first

general portals like Yahoo, and how they came into being. Portals are used in businesses of all types and sizes and this book discusses how portals can be used in large business corporations as well as small to medium enterprises. Web portals have increasing importance to marketers as, by their nature, they retain their users who must return to them frequently. They also provide a useful means of making information and knowledge readily available in a convenient form to authorised users. This book covers a wide range of issues relating to the use of portals in business.

Auditory Protheses Fan-Gang Zeng 2011-09-15

Cochlear implants are currently the standard treatment for profound sensorineural hearing loss. In the last decade, advances in auditory science and technology have not only greatly expanded the utility of electric stimulation to other parts of the auditory nervous system in addition to the cochlea, but have also demonstrated drastic changes in the brain in

responses to electric stimulation, including changes in language development and music perception. Volume 20 of SHAR focused on basic science and technology underlying the cochlear implant. However, due to the newness of the ideas and technology, the volume did not cover any emerging applications such as bilateral cochlear implants, combined acoustic-electric stimulation, and other types of auditory prostheses, nor did it review brain plasticity in responses to electric stimulation and its perceptual and language consequences. This proposed volume takes off from Volume 20, and expands the examination of implants into new and highly exciting areas. This edited book starts with an overview and introduction by Dr. Fan-Gang Zeng. Chapters 2-9 cover technological development and the advances in treating the full spectrum of ear disorders in the last ten years. Chapters 10-15 discuss brain responses to electric stimulation and their perceptual impact. This volume is particularly exciting because

there have been quantum leap from the traditional technology discussed in Volume 20. Thus, this volume is timely and will be of real importance to the SHAR audience.

The Routledge Companion to Banking Regulation and Reform Ismail Ertürk 2016-10-04

The Routledge Companion to Banking Regulation and Reform provides a prestigious cutting edge international reference work offering students, researchers and policy makers a comprehensive guide to the paradigm shift in banking studies since the historic financial crisis in 2007. The transformation in banking over the last two decades has not been authoritatively and critically analysed by the mainstream academic literature. This unique collection brings together a multi-disciplinary group of leading authorities in the field to analyse and investigate post-crisis regulation and reform.

Representing the wide spectrum of non-mainstream economics and finance, topics range widely from financial innovation to misconduct in banking, varieties of Eurozone banking to reforming dysfunctional global banking as well as topical issues such as off-shore financial centres, Libor fixing, corporate governance and the Dodd-Frank Act. Bringing together an authoritative range of international experts and perspectives, this invaluable body of heterodox research work provides a comprehensive compendium for researchers and academics of banking and finance as well as regulators and policy makers concerned with the global impact of financial institutions.

The Role of Community-Mindedness in the Self-Regulation of Drug Cultures Anke Stallwitz
2012-04-26 This book analyzes heroin users and the drug subculture on the Shetland Islands, an area known for its geographical remoteness, rural character and relative wealth. It fills the scientific gap created by the conventional research in heroin research, which is usually conducted in urban areas and relies on treatment and prison populations. Based on qualitative, in-depth interviews with twenty-four heroin users, this book depicts and analyzes the nature and historical development of the local heroin scene. It illustrates the features and internal structures of the subculture, and it examines the manner in which both are

influenced by the location-specific geographical, cultural and socio-economic conditions. It thus reveals complex causal associations that are hard to recognize in urban environments. Complete with a list of references used and recommendations for future research, this book is a vital tool for progressive and pragmatic approaches to policy, intervention and research in the field of illicit drug use.
